

Debug Extension
to the
Real Time Executive Interface Definition

DRAFT 2.0

Prepared by:

MOTOROLA Microcomputer Division

Abstract:

This specification defines a basic set of functions that constitute the Debug Extension to the Real Time Executive Interface Definition. Draft 2.0 is for public review. MOTOROLA retains the right to modify this definition as appropriate during implementation. Draft 2.0 will be submitted to the VITA technical committee no later than 01/25/88.

PRELIMINARY

DISCLAIMER

This Debug Extension to the Real Time Executive Interface Definition specification is being proposed to be used as the basis for formal standardization by the VME International Trade Association (VITA). However, since the standardization process has just begun, any standard resulting from this document might be different from this document. Any Product designed to this document might not be compatible with the final standard. No responsibility is assumed for such incompatibilities and no liability is assumed for any product built to conform to this document.

While considerable effort has been expended to make this document comprehensive, reliable, and unambiguous, it is still being published in preliminary form for public study and comment.

This document is prepared by Motorola Inc., Microcomputer Division. Interest in the Debug Extension to the RTEID is welcome and encouraged. Any technical questions, suggestions or comments may be directed to:
